Appendix 1 – Delivery Plan	Error! Bookmark not defined.
Appendix 2 - Delivery Plan Quarterly Update.....	14

1. Introduction

- 1.1. Our area encompasses a diverse and growing environment for partners including the care sector, businesses, heritage and industry where we welcome residents, tourists and commuters alike to our non-domestic premises. Such premises and workplaces fall within the scope of the Fire (Scotland) Act 2005 and its associated Regulations and are deemed “Relevant Premises”. Dutyholders of such premises are required to ensure adequate fire safety measures are provided within them. This process is achieved through the undertaking of an appropriate Fire Safety Risk Assessment.
- 1.2. The Scottish Fire and Rescue Service (SFRS) are the Enforcing Authority for the majority of Relevant Premises within Dumfries and Galloway and have a legal responsibility to ensure advice and guidance is given to Dutyholders and where required, enforce compliance with the legislation.
- 1.3. It is not the responsibility for SFRS to ensure that adequate measures are provided within these premises, that role rests with the Dutyholder/s who may be the Owner, Employer, Manager, Factoring Agent or indeed all of those.
- 1.4. This Local Enforcement Delivery Plan (LEDP) sets out our risk based area programme for the delivery of enforcement activities by our Fire Safety Enforcement Officers (FSEOs) in accordance with the SFRS Fire Safety Enforcement Policy Framework (FSEPF)
- 1.5. Using this approach we will ensure that the service we deliver is driven by consultation, in line with SFRS expectations and prepares our staff to safely, effectively and efficiently support the communities we serve.
- 1.6. This LEDP will be subject to regular review and be adaptable to meet local needs as new risks emerge and the Service further develops its enforcement strategies. It aims to communicate the clear intention of how the FSEPF will be delivered locally to achieve the agreed published goals and will concentrate on the following undertakings:
 - Routine Fire Safety Audits
 - Post Fire Audit Response
 - Locally identified themes following fire activity or intelligence received
 - Thematic activities informed by the P&P Directorate
 - Significant event planning and preparation
 - Continued resource planning

2. Structure

2.1. Within the Dumfries and Galloway Local Senior Officer (LSO) Area, a Group Commander oversees the direction and implementation of Prevention and Protection and is supported by a Station Commander that has a remit for the delivery and supervision of the Fire Safety Enforcement team.

2.2. Group and Station Commanders who have been appointed under Section 61 (3) of the Fire Scotland Act (2005) (the Act), with an enforcement responsibility, are embedded and undertake several roles within LSO Management Structures. They have a responsibility to coordinate the delivery of enforcement through FSEOs, and provide a conduit between the LSO areas and the P&P Directorate to ensure quality, consistency and policy is being achieved.

2.3. To enable enforcement activities to be effective and efficient, it is important to make the best use of the resources available, provide a clear direction for all to follow, identify achievable targets to work towards in accordance with perceived risk and most importantly communicate this to all relevant parties.

- 2.5. This LEDP relates to all audit activity and will require the support of all FSEOs to ensure the optimum delivery and benefits of the plan are realised. It will focus on the main areas outlined above, concentrating on the types of enforcement work to fulfil the FSEPF. As these roles require specialist skills, early succession planning required by local commanders is vital to adequately resource and train new personnel in the role. Following recommendations contained within the HMFSI Local Area Insection Report for D&G a succession plan for replacing FSEO's has been created.
- 2.6. Quality Assurance will be undertaken by the P&P Directorate or in some circumstances, alternative LSO Areas to promote a continuous improvement culture and provide evidence towards measuring FSE performance within each respective LSO area.

3. Responsibilities

- 3.1. The P&P Group Commander will be responsible for the production, monitoring and review of the LEDP to meet FSEPF commitments and area risks, the performance management and coordination of FSE activities and the reporting of progress to the LSO and P&P Directorate.
- 3.2. P&P Station Commanders will be responsible for planning FSE activities, which support this plan, liaising with the P&P Directorate, and the Quality Assurance and performance management of FSEOs.
- 3.3. FSEOs will be responsible for delivering against this plan by engaging with and supporting Dutyholders, monitoring audit outcomes and informing their Station and Group Commander at an early stage of non-compliance relating to formal enforcement action. This may involve gathering evidence to support the preparation of reports to the Crown Office and Procurator Fiscal Service.

4. Audit Activities

- 4.1. All audit activities within the Dumfries and Galloway LSO area will be risk based, with resources being directed and prioritised around 4 key areas:
- Premises where the risk to life from fire is greatest
 - Emerging intelligence e.g. through operational activity or partner communications
 - A risk based methodology outlined by the Directorate

- Post fire audit and analysis

4.2. As part of the risk based methodology set by the P&P Directorate, any program set by areas must include the following core activity:

- Ensure that all Care Home Services, Hospitals, Private Hospitals and Hospices which provide inpatient care are audited annually
- Ensure that newly registered Care Home Services are audited within seven working days of becoming operational
- Undertake annual audits of Hotel and Hostel premises where previous activity has identified a calculated risk level of “medium and above” and a management compliance level of 3 or more until improvements have been demonstrated and a management compliance level of 2 or less achieved
- Undertake annual audits of all other premises where previous activity has identified a calculated risk level of “High” or “Very High” and a management compliance level of 3 or more until improvements have been demonstrated
- Plan to undertake HMO audits in line with the SFRS HMO auditing policy
- Ensure relevant premises identified as having had a fire, or other significant fire safety event, will have an audit undertaken at the earliest opportunity to determine whether the incident was initiated due to inadequate fire safety measures or a failure within the fire risk assessment process
- Undertake an initial or follow up audit as a result of meeting the criteria within Stage 3 of the SFRS UFAS Procedure
- Continue to monitor and work in conjunction with Dutyholders where areas of non-compliance have been identified and action plans have been requested, to ensure that appropriate methods of resolution are being undertaken
- Where necessary, seek formal compliance of fire safety legislation by proportionate use of all available enforcement powers under the FSA

4.3. The area will also analyse previous audit outcomes, Operational Reassurance Visit data, fire activity and other intelligence sources to identify additional premises types which may be demonstrating an increased risk and not covered above, for inclusion within this delivery plan.

4.4. Appendix 1 contains the proposed delivery plan incorporating the above, with reference to the FSEPF, for the forthcoming period.

5. Audit Process

- 5.1. The principles that FSEOs must adhere to are laid out within the Scottish Regulators' Strategic code of Practice. In addition, the model laid out within the Health & Safety Enforcement Management Model (EMM) will be followed when deciding audit outcomes following a visit.
- 5.2. FSEOs are expected to be professional and courteous when engaging with Dutyholders and undertaking audits, and must be mindful of conveying a positive image of the service at all times.
- 5.3. Audit appointments will be arranged by telephone, or whenever possible, by issuing a standard letter detailing the date and time of the audit, and what the audit will entail. Dutyholders will also be informed of the likely documentation that will be inspected to allow them to have this collated in advance. Should the time or date not be suitable, contact details are provided so a mutually agreed time can be arranged.
- 5.4. The audit will commence with the FSEO showing their identification, and where required produce their 'Authorisation of Enforcement Officers Appointed' letter. This letter provides evidence of an FSEO's authority to carry out enforcement duties. They will ask to speak with the Dutyholder or other appropriately nominated person that can facilitate the audit. This can often be the Fire Risk Assessor, General Manager, Owner of the building or another person nominated for the responsibility of overall fire safety within the premises.
- 5.5. A discussion and audit of documentation should cover aspects such as the fire safety arrangements in place, the contents of the fire risk assessment (including any outstanding actions arisen from its findings), training (including evacuation), maintenance of fire systems and any fire history or unwanted fire alarm signals (UFAS).
- 5.6. An inspection of the premises will be undertaken to compare the fire safety risk assessment findings against the hazards and measures in place at the time of visit. The detail of the inspection will depend on a number of factors including size, age, access and overall management of the building. It is important that a nominated person be available to assist the FSEO, to provide access to restricted or locked areas and to advise on any health and safety issues particular to the building that may be relevant to the inspection.
- 5.7. It is likely the process should last between 1.5 – 3 hrs though this is a rough guide. At the end of the inspection, the FSEO will summarise the findings of the inspection with the responsible person and ensure they fully understand

what they are required to do to remedy any deficiencies relating to fire safety. This will be followed up in writing by the officer at the earliest opportunity. Contact details will be provided to the Dutyholder so that they can clarify points or raise concerns following the audit, if necessary.

- 5.8. On some occasions, the findings of the audit may result in the need for an action plan to be drawn up and proposed for agreement with the FSEO. The officer will explain what this entails and engagement shall continue to ensure progress throughout the period of that plan.
- 5.9. On some occasions, formal enforcement action will be necessary e.g. an Enforcement Notice requiring works to be undertaken within a specified time period or a Prohibition Notice prohibiting / restricting the use of the premises (or part of the premises) due to serious and imminent fire safety concerns which pose a risk to life. The officer will fully discuss the implications of any Notice and the process of appeal will be outlined in any correspondence.
- 5.10. The FSEO will fully explain the reasons for any need to improve fire safety measures within the premises and will consider the level of risk against the sacrifice involved in terms of time, effort and expense to implement those measures. In the event of a failure to agree, a Dutyholder can initially raise their concerns with the local P&P Commander who will review the situation and, where appropriate, suggest a resolution. Where concerns remain, the Dutyholder will be given contact details for the P&P Directorate who will further review the situation and advise accordingly. In the event that a disagreement remains, the Dutyholder can [raise a dispute](#) with [Her Majesty's Fire Service Inspectorate](#) for Scotland who will undertake an independent review.

6. Quality Assurance

- 6.1. All audits undertaken will follow a process of quality assurance. This is generally actioned by the Station Commander who will process the completed audit on an electronic system. However, occasionally the local P&P Commander may request support from the Directorate and an independent review may take place. The findings of the audit will be assessed and discussed with the FSEO concerned.
- 6.2. The Directorate may periodically peer review (or instruct other LSO areas to peer review) audits to maintain a consistent approach and to share good practice throughout SFRS. The findings will be fed back to all LSO areas to promote effective and consistent delivery across the enforcement function.

7. Performance reporting

- 7.1. The P&P Group Commander will produce a report against this LEDP and present this to the SFRS P&P Local Managers Meeting on a quarterly basis. This will provide an update of progress against the clear targets laid out within the plan detailed below, and ensure that the area continues to support those premises deemed at highest risk.
- 7.2. The report will also provide an update to the LSO on any changes or intelligence that has affected the plan, and enable the LSO to report progress to the Community Planning Partnership as part of the Local Area Plan.
- 7.3. The report will also be tabled at the Dumfries and Galloway Area Management Team Meetings, along with the monthly update, and discussed as part of the area liaison and performance management meetings with the Directorate.

APPENDIX A – LOCAL ENFORCEMENT DELIVERY PLAN

Dumfries and Galloway LSO Area Local Enforcement Delivery Plan 2020/2021 Expected Audit Activity									
Premises Type / Audit Type	Number of Premises	Number of Buildings	Framework Premises	Q1	Q2	Q3	Q4	Completed YTD	Commentary
Care Homes	66		Yes	0	12	21	33	66/66	Mostly Remote Audit
Hospitals	11		Yes	0	0	0	11	12/11	Remote Audits / +1 extra Hospital brought on line due to COVID-19
Prisons	1		No	0	0	0	1	1/1	Remote Audit
Hotels: MCL 3 and VH	0		Yes	0	0	0	0	0/0	Total Hotels in D&G = 224
Hotels: MCL 3 and H	2		Yes	0	0	0	0	0/1	Total Hotels in D&G = 224 One premises closed. One premises not carried out due to Covid but not taking guests.
Hotels: MCL 3 and M	5		Yes	0	0	1	0	1/5	Total Hotels in D&G = 224 One premises closed. One audited. Audits not carried out due to Covid restrictions. Will be carried out Q1 2021-22.
Previous MCL 3 and VH	0		Yes	0	0	0	0	0/0	
Previous MCL 3 and H	2		Yes	0				/2	
HMO (as per Policy) Max % quoted	H = M = L =		Yes	0	7	12	13	32	Unable to operate Policy due to very low numbers of HMO's within Dumfries and Galloway.
Post Fire Audit*	20 approx.		Yes	0	3	5	2	10	
All other H & VH	33*		Yes						*Many premises included in mandatory audits above. Some businesses closed or restrictions in place due to Covid-19.
All other due list work	0		No	0	0	0	0	0	

FSE Notification from Ops*	unknown		Yes						
Complaint*	unknown		Yes	1				1	
UFAS Stage 3 Audit*	N/a		Yes	0	0	0	0	0	UFAS dealt with prior to meeting Stage 3 triggers in D&G.
Thematic*	unknown		No	0	0	0	0	0	No thematic audits due to COVID-19 restrictions.
Total Number of Identified Risks	1029								Remaining work will be carried over to the next reporting year, only low risk premises will be deferred.

*Based on previous year figures

Formal Action Taken

Enforcement Activity	Previous year activity	Q1	Q2	Q3	Q4	Total	Commentary
<u>Statutory Notices</u> Enforcement notice (EN) Prohibition notice (PN) Alteration notice (AN)	EN =0 PN =0 AN =0	0					Actively policing live prohibitions and working with duty holders where possible

Local Initiatives Planned

Other Work	Initiatives	Commentary / Outcome
Q1	Engagement event with B&B/Airbnb/Self-Catering premises duty holders to promote Fire Safety within this sector.	Cancelled due to COVID-19 restrictions
Q2	<p>On-line engagement event with B&B/Airbnb/Self-Catering premises to promote Fire Safety within this sector.</p> <p>On-line engagement event with shop/office/other workplace premises to promote fire safety during COVID-19 recovery phase.</p>	On-line engagement will replace the seminar events due to take place during Q1 that were cancelled due to COVID-19. The engagement session for shop/office/other workplaces will also highlight potential fire safety issues during a return to normal following COVID-19, and the effects physical and managerial changes can have on fire safety within.
